

19.- 20.06.2009, Burbach-Wahlbach, Germany

## Hess Group In-House Trade Fair 2009

This year, the Hess Group from Burbach-Wahlbach is once again inviting trade visitors and interested parties to its regular in-house trade fair. The complete outfitter for the concrete stone industry will present itself on Friday, 19/6/09 from 9am to 6pm and on Saturday, 20/6/09 from 9am to 1pm.

A selection from the Hess Group's range of products will be shown on both days. Hence, room for interesting trade conversations will once again be offered in Burbach.

The exhibits at the in-house trade fair will include:

- the "Cut Master" horizontal stone saw
- the RH 2000 static board machine

- the RH 1500 static board machine
- the RH 600 static board machine
- the SM 2250 SP mixer
- Moulds
- AAC accessories

Visitors and interested parties are requested to register for the trade fair at the address given below.

3rd - 4th December 2009, Vienna, Austria

## Engineering Days 2009

There will be a new edition of the Engineering Days from 3rd to 4th December 2009 at the Renaissance Hotel "The Imperial Riding School Vienna" in Vienna, Austria. The good and continuing feedback from 2007 has encouraged the organisers to expand the range of topics further and to increase the number of speakers and exhibitors.

The idea of the Engineering Days 2009 is to present current trends, topics and technologies in concrete precast works in the form of selected technical presentations, experience reports and workshops and to discuss them.

The conference is aimed both at managing directors and managerial staffs of concrete works and at their technicians.

A conference is planned which – in the interests of customers – will be open to all. In parallel there will be an exhibition by

manufacturers from the fields of plant construction, automation technology, CAD and ERP systems.

International Chinese Concrete Days

## Concrete China 2009

According to the organisers, over 3000 visitors came to the Concrete China 2009 at the China National Convention Center in Peking, including numerous international interested parties from more than 20 countries.

Opening ceremony of the Concrete China 2009

Domestic and foreign exhibitors offered the interested visitors the opportunity to inform themselves about the latest products for the concrete industry during the three-day trade fair. The fringe programme of the international Chinese concrete week included lectures by experts, a conference of members of the Chinese trade associations, technical seminars and training courses.
