

Besser Company, Alpena, Michigan, 49707 USA

Fully Automatic Masonry Aging System

The Besser Masonry Aging System (MAS) will cost-effectively expand a producer's product line by creating unique unit faces and backs. The MAS can age segmental retaining wall units (SRWs), architectural units (split, fluted, scored, stri-face) and standard block. The MAS can age units from 290 mm x 90 mm x 190 mm (12" wide x 4" high x 8" deep) to 590 mm x 190 mm x 290 mm (24" wide x 8" high x 12" deep).

The MAS can age the front, back or front and back of units automatically.

The inline Masonry Aging System (MAS) automatically gives the face and/or the back of a concrete masonry unit or segmental retaining wall unit an aged appearance. Aging is totally random and adjustable. A variety of aged looks can be created that will appeal to your marketplace. Three machine operations can be easily changed to create the different looks.

The speeds of the impactor heads, the rotation speeds of the clamps and the amount of time the unit is held under the impactor heads can each be adjusted to achieve the appearance the producer desires. If the producer prefers the MAS can be used offline. Powered V-wheels allow it to easily be moved out-of-line.

Like all Besser equipment the MAS is engineered and manufactured to excel in the harsh plant environment.

SR-Schindler Steinbearbeitungsmaschinen – Anlagentechnik GmbH, 93057 Regensburg, Germany

Supply guaranteed for Schauer+Haeberle machines

Following the insolvency of Schauer+Haeberle GmbH, SR Schindler has acquired all industrial rights and drawings, programs, spare parts lists, rights as to the use of names, models and the entire stock of spare parts from Schauer+Haeberle GmbH.

The supply of spare parts and care of former Schauer+Haeberle GmbH customers is therefore secured throughout the world with immediate effect.

SR-Schindler will continue to maintain the extensive product range with more than 400 moulds for producing customer-specific paving slabs. A complete, smooth transfer is therefore ensured by experienced former

Schauer+Haeberle staff from the company's design, electronics and programming, spare parts and wearing parts and assembly and service departments.
