

Successful presentation of performance

2017 Topwerk Group in-house exhibition

The Topwerk Group presented itself to industry experts at an in-house trade fair in Burbach-Wahlbach on 27 and 28/09/2017. A selection from the extensive product portfolio of one of the world's leading suppliers of machines and systems for the shaping and finishing of concrete products was presented on both days.

Visitors and interested parties were cordially invited to get an impression of the group's complete range of services: The Hess after-sales service made various presentations and several concrete block making machines were on show, some of them in operation. Further exhibits included a stone doubler, a washout machine, a concrete mixer, a transport pallet silo, a finger car, a board finger car and a cuber.

The declared goal of the trade fair was the presentation of the Topwerk Group as well as the Hess manufacturing site in Burbach. This goal was achieved in an impressive manner and to everyone's satisfaction as the visitors showed great interest in the exhibits on show and their production. Two of the concrete block machines were still in a half-assembled condition and thus offered insights that are no longer possible later when the machine is fully assembled.

The event was popular on both days once again with 350 visitors. The international visitors came from the most diverse regions of the world.

As companies from the Topwerk Group, Prinzing-Pfeiffer, SR-Schindler and Hess AAC had their own information booths, which were highly frequented.

The atmosphere was relaxed on both days. After viewing the exhibition in the production halls, the visitors sat for quite a while in the marquee, discussing and exchanging views. ■

The information booths of Prinzing-Pfeiffer and SR-Schindler were also highly frequented.
