

Prinzing Pfeiffer GmbH, 89150 Blaubeuren, Germany

## Andreas Bartuli is the new Sales Director with Prinzing Pfeiffer

With effect of January 1<sup>st</sup> 2020, Andreas Bartuli took over as new Sales Director with Prinzing Pfeiffer. Mr Bartuli holds a BA degree in business studies and has more than 10 years of experience in the concrete industry.

"Our focus is clearly on the satisfaction and success of our customers - this is our top priority. We want to continue to develop our proven technology in an innovative and customer-optimized way. Our experience, commitment and team spirit help us to conceive efficient solutions which allow our customers all over the world to deliver premium-quality products. This ensures a successful future for us and for our customers," Bartuli says.

His emphasis as Sales Director will be on further extending the awareness for and presence of Prinzing Pfeiffer on a globalized market. Another major target is to provide industry-wide excellent customer service and push market penetration in cooperation with professional trade partners and regional agencies.

The Prinzing Pfeiffer product portfolio comprises individual machines as well as a full range of accessories such as mixing

Andreas Bartuli

plants, cage welding machines, and handling systems to implement turnkey production lines for the manufacture of pre-cast concrete parts for infrastructure construction. The company with its two locations in Blaubeuren and Aarbergen is a member of the globally acting Topwerk Group. ■

## Intensive High-capacity Half-slab production line

**Product:** half-slabs, inner wall panels, external wall panels, double prefabricated wall panels and so on.  
**High capacity:** perfect combination of assembly line and soft line which may reach a capacity of 100 m<sup>3</sup> in two shifts.

**Low cost:** tunnel curing chamber adopts solar energy assisted heating and steam generator generated steam rapidly.

**Small floor area:** the plant occupies a small area (about 30000m<sup>2</sup>) with a length of 150m which reduces the investment in land.
