

MSM Formenbau GmbH, 56459 Langenhahn, Germany

High-quality concrete moulds and formwork construction from the Westerwald

For Pfeiffer Maschinenfabrik, a well-known company throughout the industry, two prerequisites determined the founding in 1963 of the Langenhahn plant in the northeast of Rhineland-Platinat: the untapped pool of skilled workers at that time and the required separation of production from the Pfeiffer mother plant in Ettlingen (Baden-Württemberg), which was specialised in machinery construction.

Thus, MSM Formenbau has been an expert partner for bespoke solutions in concrete moulds and formwork construction for almost 60 years. At the site in Langenhahn, 30 employees design and manufacture mainly large moulds,

special moulds and other equipment for the precast industry – each individually adapted to the requirements and specifications of their customers.

Another important business area for MSM Formenbau is the maintenance and repair of existing steel moulds and other mould components. First, trained service technicians check each received mould part for wear, mechanical functionality and dimensional accuracy before commencing professional repair as agreed with the customer. After all, timely maintenance and/or adequately executed repairs ensure a good, reliable and continuous production process.

Conical Tornado core during machining

MSM Formenbau GmbH has been a 100% subsidiary of Prinzing Pfeiffer GmbH since 1st October 2021. Cooperation with such a strong and reliable partner optimally enables using both product-specific and industry-specific synergies and remaining focus on growth and innovation.

With over 2,300 m² of production and office space and an extensive machinery pool, it is possible to produce a wide range of round or rectangular steel moulds up to a turning diameter of 4,500 mm and a turning length of 10,000 mm,

with a maximum weight of 8 tons. In the case of face turning works, diameters of up to 6,000 mm, turning lengths of 400 mm and a maximum weight of 3 tons are possible.

As a modern, mid-size company integrated into a strong group of companies, MSM Formenbau GmbH is thus very well equipped for future challenges. ■
